5stelle* is a native cloud based pms, that make you save time and ease your hotel management and online sales, on a daily basis.

The reception is always under control. Thanks to native cloud technology you can manage your accommodation anywhere, anytime. With the new Pocket feature, you can take care of your business even from your smartphone.

Full control of on-line and off-line sales. 5stelle's ALL IN ONE solution, so you can manage the OTA's and the booking engine at the same time. Overbooking will be no longer a problem.

Hardware free. 5stelle* runs on any device, even on your MAC. No servers, cables or installation cost. You just need an internet connection.

Affordable and all inclusive...annual fee depending on the number of the rooms. Telephone and online assistance 7 days a week, updates, hosting and data backup, workstations and users: are all included. Set-up is quick and easy!

Today 5stelle* is a complete suite of cloud solutions for an agile and advanced management of any accommodation facility.

Property Management System, CRM, Booking Engine, Channel Management, Payment Gateway, Restaurant POS, Business Intelligence, Housekeeping, Open API platform.

More than 2700 independent hotels and hotel groups located in 15 countries are relying on us, would you like to be next?
